

SPOT

Accelerated Curing System

Get more high-quality repairs done faster with the REVO Spot. This impressive tool is an ideal solution for quickly curing small surfaces. The single-cassette REVO Spot can be effortlessly moved into any paint booth, prep station or virtually any area in a shop. In addition to fast curing, this unit is well suited for applications such as aluminum repair, bumper repair and dent removal.

GET MORE HIGH QUALITY REPAIRS IN LESS TIME – RELY ON REVO.

SPOT

Features & Benefits

Durable, Mobile Cart

With a strong, durable cart, the REVO Spot can be easily maneuvered around your shop to wherever you need it. This compact unit takes up a minimal amount of valuable floor space. Although small, the 6-kw REVO Spot is a powerful tool, curing most coatings in minutes.

Up to 80% More Paint Shop Throughput

REVO Accelerated Curing Systems allow you to do more high-quality repairs in less time. Using short wave electric IR technology, these revolutionary systems cure fillers and coatings quickly from the inside out. Curing time for both prep and paint phases of repair can be reduced by hours, freeing up your technicians to complete additional repairs.

Multi-Functional Tool

In addition to rapidly curing fillers and coatings, REVO Spot is well suited for many other applications, including dent removal, and aluminum and bumper repair. This versatile tool can help your shop be more productive.

Easy-to-Operate Controls

The REVO Spot is easy to use. Simply turn the knobs to set the curing time and temperature. A temperature sensor automatically adjusts the lamp to ensure you don't overcure or undercure the coating. Once the set temperature is reached, the bulbs will pulse to control and maintain temperature. This also extends the life of the bulbs and saves energy.

Quick Heating & Cooling Times

Lamps on the REVO Spot reach curing temperature almost instantly. Built-in fans cool the unit down in seconds. The unit can be turned on only when needed and is safe to touch shortly after being turned off.

Expert Support & Service

All REVO Systems are backed by Global Finishing Solutions to provide support and reliability. Each system has been expertly designed specifically for the automotive repair industry. And with on-site training available, learning to use any REVO System is easy.
